Summary

I'm an 17-year-old self-taught developer building AI-powered web products — and documenting the entire process here, mistakes included. Right now that means three things running in parallel: shipping full-stack projects (Next.js, TypeScript, PERN stack), grinding through Striver's DSA sheet daily, and making my first real time web app a Collaborative Code Editor. I started with no formal CS background — just a BCA program, YouTube, docs, and a lot of broken builds. Everything you'll see posted here is real: real commits, real bugs, real client-style project work from my portfolio. I'm currently open to internship/full-time roles and select freelance web projects. If you're hiring, building, or just want to follow the journey — let's connect.

Experience

Independent Full-Stack Developer at

April 2025 -

Education

Vedanta international school narwana

2023 - 2025
